PORTABLE POOL LIFT , AVANT - GRADE TECHNOLOGY- 700800

Powered portable pool lift , avant - grade technology -A real dream The latest product created by DiGi project. It is innovative in its features thanks to the control bar with automatic traction, no efforts required by the operator . Improved autonomy and capacity up to 145kg. Maximum safety degree thanks to 8 safety levels. All this makes the universal reference for pool lifts.

SPECIFICATION OF POOL

Lifting capacity 145kg
 Max arm travel :1500mm
 Depth of seat inside the water:900mm
 Time of lowering with weight:25sec
 Time of lifting with weight:18 Sec
 Weight :260kg
 2 speed automatic handling
 Autonomy :100 working cycle
 Automatic bar , forward motion by up and down control levers
 battery charge level indicator and emergency button
 Rotating drives wheels radius :200°
 Hydroelectric box
 Manual emergency operation system in case of failure of electric system
 Automatic braking system integrated in the wheels.
 Safety braking system by means of automatic stoppers to prevent from excessive approach to the water
 Infrared ground detector
 Safety motion system by means of vertical bar switch off
 battery 24V
 Battery charger
 Zinc coated steel frame +180° powder coating finish
 2 point safety belt
 4 or 5 point safety belts (on request)
 Headrest
 Removable leg support
 Ground fixing kit (on request)
 Handset to control up and down movements (on request)
 Cover (on request)

POOL SURROUND EQUIPMENTS

Portable Pool Lift

PORTABLE POOL LIFT - 700900

SAFETY MEETS THE DESIGN

Pool lift is a medical device which enables the access to the pool to persons with reduced mobility in a safe, comfortable and functional way. pool lift is the result of the evolution of the best seller model. Pool lift which has been on the market for over that 10 years. This new pool lift is improved in the design, technology and lifting capacity. In developing this model take care of ensuring all the safety levels, for both the user and the operator, which are present in all the brand devices.

SPECIFICATION FOR POOL LIFT

- Maximum capacity 140kg
- Maximum arm travel 1400kg
- Time of lowering with weight 25 sec
- Time of lifting with weight 18 sec
- Weight of the machine 150kg
- Battery 12 V
- Power 24 V

TECHNICAL FEATURES OF POOL LIFT

- Starting key
- Emergency Mushroom shaped button
- Battery charge level indicator
- External battery charger
- Autonomy 80 complete cycle
- Hydroelectric box
- Manual lowering lifting system in case of problems with the electric system
- Brake lever with electric release
- Service brake on front wheels
- Safety front rubber stoppers
- Painted stainless steel frame for the parts in contact with water
- 2 point safety belt
- Pivoting rear wheels

OPTIONAL

Infrared detecting system with sound alarm to monitor nearing to the pool edge.

It is to be stopped by braking

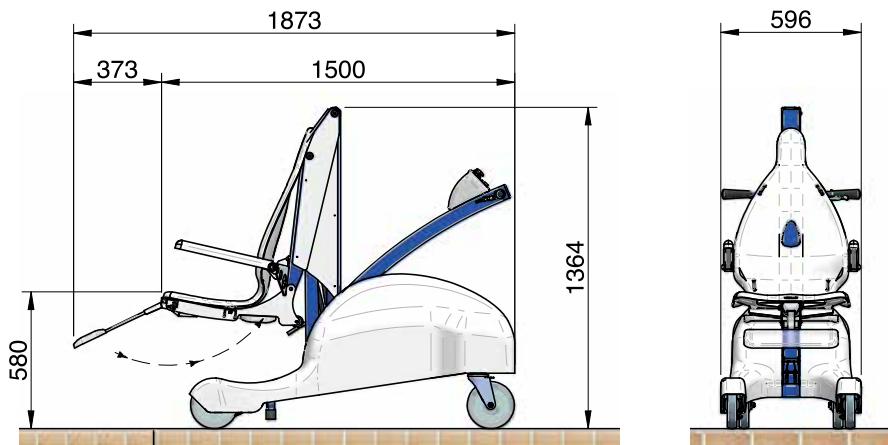

Removable leg support

4 point harness

5 point harness

Handset to control lifting and lowering operations in autonomy

Cover

PORTABLE POOL LIFT FOR PEOPLE WITH DISABILITIES - 700600

Bluone is a device that can transfer people to and from pools, dressing rooms and other places in an easy, smooth and safe manner. Bluone is easy to use. the person simply sits on the seat at the front and is pushed to the edge of the pool. Simply operate the brake and clock position, press the down button and the swimmer is lowered into the pool. It is sufficient to press the up button to lift the seat again and bring it back to the original position.

INNOVATIVE FEATURES OF PORTABLE POOL LIFT

This pool lift has been developed by our skilful engineers after years of experience in providing solutions for people with disabilities. Although designed for wheelchair users, this hoist can assist anyone who struggles to get in and out of a swimming pool. Our company aims to give a real help to those inner needs that are frustrated by everyday difficulties by making a free life whenever you are.

TECHNICAL DEVICES

key - starter and emergency stop red button Handbrake - The up and down controls will not operate unless the handbreak is set. The lift is equipped with an emergency manual pump. Use it in case of electrical power failure. Rubber stoppers between front and rear wheels to prevent the lift from falling into the water. As the arm lowers, two steel rubber capped support provides additional stability. Emergency manual pump. Automatic rubber capped support.

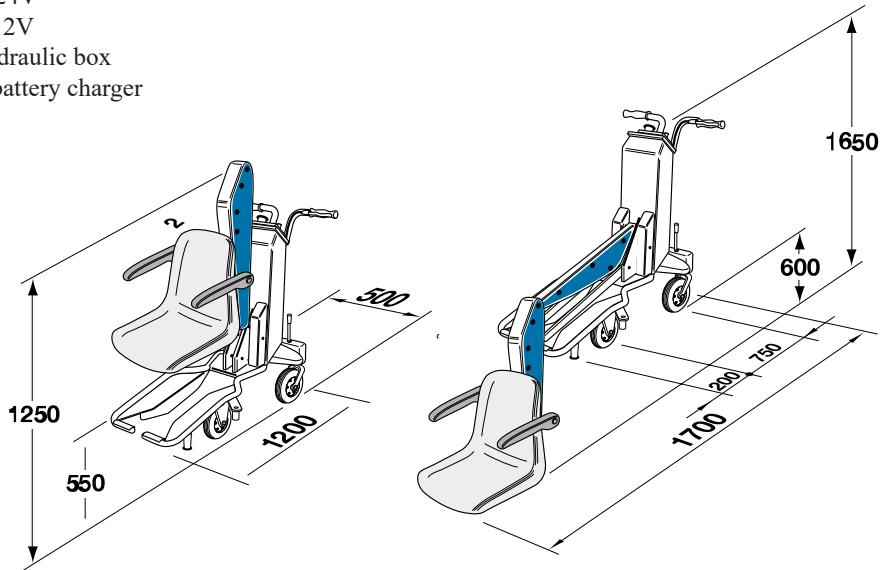

ACCESSORIES

Headrest - To be fitted to the lifting arm, at the back of the seat
 Harness - 5 point harness with pelvic fastening for serious disabilities
 Cover - to protect bluone from atmospheric agents
 Ramp - to sketch according to the pool edge

FEATURES / MATERIALS / EQUIPMENT

- Lifting capacity - 110Kg
- Max.travel - 1150mm
- Time of down - lifting with weight - 23 sec
- Time of up - lifting with weight - 17 sec
- Total weight - 120Kg
- Frame - Zinc coated steel
- Powder coating finish - 180°
- Battery - 24V
- Power - 12V
- Electrohydraulic box
- External battery charger

ANTI-SLIP DESIGN GRATINGS WHITE COLOR

Proteam Europa overflow gratings made of UV protected white ABS with unique anti spill design, the water will never spill on to the deck of the pool. 45 units in single linear meter. Also available in different colours.

Code White	Code Beige	Height (mm)	Width (mm)	Volume m ³	Packing (m)

PROTEAM EUROPA PVC - P COATED LININGS

Are suitable for lining swimming pools, tanks, ponds and lagoons as a permanently sealed membrane. The structure of ground condition must be stable and capable of supporting the lining material and contained water pressure. The lining must extend above the highest water level and be secured and sealed at edges to prevent water infiltration to the underside of the membrane. The lining sheets are laid loosely so that they can bridge any movements or cracks in the building caused for example by shrinkage. It must be taken into account that condensation may occur on the side away from the water. We recommend to provide secondary outlets or discharge bores below the lining.
